We will investigate your complaint and will correct any error promptly. READY RESERVE

BALANCE COMPUTATION METHOD — The FINANCE CHARGE is assessed on the average daily balance on your account. We figure the interest charge on your account by applying the periodic rate to the "average daily balance" of your account. To get the "average daily balance" we take the beginning balance of your account each day, add any new advances, and subtract any unpaid interest or other finance charges and any payments or credits. This gives us the daily balance. Then, we add up all the daily balances for the billing cycle and divide the total by the number of days in the billing cycle. This gives us the "average daily balance."

BALANCE COMPUTATION METHOD — The FINANCE CHARGE is assessed on the average daily balance on your account. We figure the interest charge on your account by applying the periodic rate to the "average daily balance" of your account. To get the "average daily balance" we take the beginning balance of your account each day, add any new advances, and subtract any unpaid interest or other finance charges and any payments or credits. This gives us the daily balance. Then, we add up all the daily balances for the billing cycle and divide the total by the number of days in the billing cycle. This gives us the "average daily balance."

READY RESERVE

BALANCE COMPUTATION METHOD — The FINANCE CHARGE is assessed on the average daily balance on your account. We figure the interest charge on your account by applying the periodic rate to the "average daily balance" of your account. To get the "average daily balance" we take the beginning balance of your account each day, add any new advances, and subtract any unpaid interest or other finance charges and any payments or credits. This gives us the daily balance. Then, we add up all the daily balances for the billing cycle and divide the total by the number of days in the billing cycle. This gives us the "average daily balance."
